New Delhi India

## SUMMARY

Engineering student with hands-on experience in AI, IoT, and full-stack development, actively contributing to technical projects and team initiatives. Proven ability to lead, collaborate, and execute under pressure through ACM and real-world projects. Passionate about building scalable tech solutions, organizing impactful events, and fostering a strong developer community.

## SKILLS

- Problem Solving
- Artificial intelligence
- Single chip board systems
- UI/UX
- Marketing and Social media
- Analytical Thinking
- IoT
- Web Development
- Basic SaaS architecture

## EXPERIENCE

- 10/2025 - Current

**Junior Committee and working team member, ACM, Jaipur, India**

Collaborated with teams on web development and hardware projects.

  - Achieved first position in RoboSoccer at LNMIIT Plinth with team.
  - Participated in multiple events at Plinth including RoboClencher, RoboSoccer and LFR.
  - Contributed to ACM-organized events such as Techideate and Oneiros'26.
  - Managed logistics for events, ensuring smooth operations and participant engagement.
- 06/2025 - 07/2026

**IoT intern, Abilities India, Delhi, India**

- Worked on building AI models to help and reduce overall manual tasks and errors
  - Built a heavy duty LFR Cart using Arduino and ESP-32 to carry heavy loads and equipment from one workshop to the other (10-20kg).
  - Worked with software engineers and gained experience in using and managing inspection softwares
  - Coordinated and handled major issues with the team.
  - Built a conveyor system and worked with high quality cameras to install and work with AI models developed locally.

## EDUCATION

- Expected in  
01/2029

**BTech., Electronics and Communication**

**Manipal University Jaipur, Jaipur**
- High School**

**Sri Venkateshwar international school, New Delhi**
